

RISHI J

SOFTWARE ENGINEER

London United Kingdom • +44 7823802969 • jrishirajkumar@gmail.com
• **LinkedIn:** <https://www.linkedin.com/in/rishijawahar/>

Professional Summary

Software engineer with five years of experience in backend, frontend, and DevOps in top firms like Sage and Oracle Cerner; promoted twice within three years due to exceptional performance. Spearheaded initiatives that reduced sync time by 93% and increased user adoption from 10 customers to over 1k in six months through effective product engineering. Recognized with awards such as Night of the Town at Oracle Cerner for outstanding contributions to consumer engagement initiatives.

Technical Skill Set

- **Programming Languages:** Ruby, Python, Java, JavaScript
- **Frameworks:** Ruby on Rails, Flask/Django, React/Redux, Kafka, Hadoop, FastAPI, GrapeAPI
- **Database:** SQL, PostgreSQL, Redis, MongoDB, CockroachDB
- **DevOps/CI/CD:** Docker, Terraform, Jenkins, Spinnaker, Grafana, New Relic
- **Tools:** Appsmith, Pendo, Sidekiq, Elasticsearch, RabbitMQ, LangChain
- **Cloud Platforms:** AWS (Lambda, EC2, S3, CloudWatch, EMR, RDS), GCP (BigQuery, GKE, IAM)
- **AI/ML:** TensorFlow, PyTorch, Keras, Transformers (NLP)
- **Other Technical Skills:** Data Structures, Algorithms, Code Reviews, SDLC, Micro Services, Database Design, Open API, Prompt Engineering

General Skills

- Object Oriented Programming
- Full Stack Development
- Cross Team Collaboration
- Product Development
- System Design and Architecture
- Agile Methodologies

Education

Master of Science: Data Science, 02/2024 to 03/2025

University of Surrey - United Kingdom

- Achieved First-Class with Distinction (73.12% average).
- Built a cloud-based Monte Carlo simulation app for real-time stock data (IaaS scaling).
- Achieved 93% precision on an NLP transformer model for abbreviations detection.
- Researched novel spiking neural network with homeostatic mechanisms; conference paper in progress..

Bachelor of Engineering: Computer Science Engineering, 06/2015 to 05/2019

Anna University - India

- Graduated with First Class and Distinction

Work History

Senior Product Engineer II, 08/2022 to 12/2023

Sage Group

- **Governed** three vital projects in alignment with strategic roadmaps, enhancing software deployment frequency to twice per week and shrinking incident response time to under four hours.
- **Architected** scalable Ruby on Rails backend for ERP integration, enabling secure multi-currency support.
- **Reduced** Sage Inbox sync time from **30 minutes to 2 minutes**, significantly enhancing user experience.
- **Engineered** new features for the Sage Inbox App using data-driven decisions, which directly contributed to growing user adoption.

- **Built** a fault-tolerant data sync system using exponential back off, reducing the error rate by 99%.
- **Architected** a Ruby SDK for platform APIs, replicating ActiveRecord querying; facilitated seamless data access for developers, accelerating feature development cycles by 30%.
- **Implemented** CI/CD pipelines, cutting deployment times by 50% and improving release consistency.
- **Developed** Elasticsearch-based global search, unifying Sage ERP systems and emails.
- **Spearheaded** the integration of a third-party logging service that improved application debugging and monitoring capabilities, leading to a 50% faster identification of root cause issues.
- **Developed** a 2-way web hook system to provide data consistency across mirrored databases across applications.

Keywords: Data Reliability, System Design, ActiveRecord, SDK Development, Fault Tolerant Systems, MVC, E2E Development

Product Engineer, 09/2021 to 08/2022

Lockstep

- **Developed** final builds and deployed production changes, ensuring high-quality deliverables.
- **Designed** the Lockstep Inbox architecture, integrating it seamlessly with existing systems; personally wrote 15,000+ lines of code and resolved 50+ critical bugs during the launch phase.
- **Engineered** a new RSpec test suite for the monolith application, achieving 100% code coverage within one week, reduced manual QA testing hours by 20 per week.
- **Coordinated** with engineering, QA, and design teams to plan, build, and debug key features.
- **Spearheaded** invoice automation via Photon Commerce API, cutting manual entry times by >80%.
- **Fostered** career growth through personalized coaching, leading to the promotion of two junior engineers to mid-level positions within 12 months, showcasing the impact of mentorship.
- **Worked** with the setup of 1.5 week sprints enabling iterative releases and improved efficiency.

Keywords: Agile, Scalability, Product Development, Big Data, System Design

Software Engineer, 10/2019 to 09/2021

Cerner Corporation

- **Developed** full-stack healthcare software, boosting reliability and performance across critical systems.
- **Architected & Implemented** 10+ reusable microservices for patient data management using Domain-Driven Design, which enhanced data accessibility across the healthcare provider network and improved data quality.
- **Built** public APIs using Grape, ensuring seamless integration across multiple healthcare platforms.
- **Improved** API response from 6–7s to under 2s, significantly enhancing user satisfaction.
- **Created** the HI-Tooling Console, enabling consultants and clients to deploy sites in under five minutes using Terraform (Infrastructure as Code).
- **Served** as point of contact for third party contractors and as an anchor for other internal teams.

Keywords: Microservices, Full Stack, Agile, Cross Team Collaboration, REST API, Consumer Engagement

Accomplishments

- Recognized for setting up a scalable React on Rails template and leading the Healthe Life Allergies Application for U.S. Defense Veterans, optimizing performance and APIs.
- Piloted the Admin Tooling Console project, pioneering Rails Engine and NPM React Package setups while leading live demos, which resulted in Q3 Award recognition for excellence and innovation.

Certifications

Applied Machine Learning in Python by University of Michigan - NNAGQCAB8XXL, 09/2019

Introduction to Data Science in Python By University of Michigan - 4HWTDLVW8NGJ, 09/2019

Completion Award for Oracle MOOC: PL/SQL Fundamentals By Oracle , 02/2018

Structuring Machine Learning Projects By Deep Learning AI - 2XQVQN4BXR2, 06/2018

Divide and Conquer, Sorting and Searching, and Randomized Algorithms By Stanford Online - L4AAMR4N34Y4, 07/2017
